Cleaning solutions for reusable endoscopes

Channel, valve, dual-ended, handled and multi-brush configurations

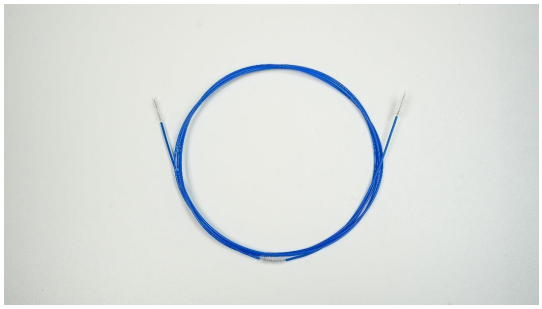

Yiwu Xiyue Medical Technology Co., Ltd. manufactures disposable endoscope cleaning accessories for professional reprocessing workflows. Our products are available in multiple brush diameters, head lengths, working lengths and handle configurations.

We support OEM and ODM projects, customized sizes, private labels, sample evaluation and production for distributor programmes. Quality checks are applied from incoming material inspection through production and final inspection.

Custom specification support

- Brush diameter and brush-head length can be developed for target channels.
- Working length, sheath colour and handle design can be adjusted by project.
- Final model selection should follow the endoscope manufacturer's cleaning instructions.
- Contact us with the scope type and target channel dimensions for confirmation.
